

Static Electricity Balloon.

It's a perfect "hands-on" way for preschoolers to feel what a tiny version of lightning feels like.

Here is a whimsical way to layout that page:

Experiment: Catch a Cloud High-Five! 🎈⚡

What you need:

A balloon

Your hair (or a wool sweater)

The Experiment:

Rub it: Rub the balloon on your hair for 10 seconds.

The Magic: Hold the balloon near a wall or your hair and watch it "stick" or make your hair stand up!

The Lesson: Just like the balloon, clouds rub together to get "wiggly energy." When you feel that tiny POP, you've just made a tiny high-five—just like lightning!
